Final Rejection

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/20/2005 has been entered.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 36 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yokoi (Patent Number JP-409077436-A) in view of Folkenroth et al. (U.S. Patent Number 3,982,718).

Art Unit: 3654

4. Referring to claims 36 and 37. Yokoi discloses a double-deck elevator comprising an upper cage (Cu) and a lower cage (Cd) for accommodating passengers and vertically movable together in a hoistway. Yokoi does not disclose a cover enclosure for the space between the upper cage and the lower cage.

Folkenroth reference discloses an elevator system comprising a cover for covering a space between a platform and a base in order to conceal the drive mechanism therein between.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the teachings of Yokoi to include a cover for the space between the upper cage and the lower cage of the double-deck elevator as disclosed by Folkenroth because the protective covers would prevent foreign objects from entering the door driving unit.

It would have been further obvious to one having ordinary skill in the art at the time the invention was made to modify the teachings of Yokoi in view of Folkenroth to have aligned the outer surface of the covers (102; Folkenroth; Figure 1) to be aligned with the outer surface of the upper and the lower cage of Yokoi such that the cover ends of a particular side are aligned in the same plane because the aligned cover ends would reduce air resistance as the elevator moves within the shaft.

Allowable Subject Matter

Art Unit: 3654

5. Claims 38-51 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

- 6. Applicant's arguments filed 07/17/2006 have been fully considered but they are not persuasive. The previous rejections stand.
- 7. In response to applicant's argument that the references fail to establish a prima facie case of obviousness, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).
- 8. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Application/Control Number: 10/620,384

Art Unit: 3654

9. In response to applicant's argument that Folkenroth et al. reference is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See In re Oetiker, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Folkenroth reference shows an elevator system (Lifting system) having an elevating mechanism for lifting and lowering a platform relative to a base. Thus, Folkenroth is analogous art. Even if Folkenroth reference is used in a different environment, Folkenroth teaches using a cover for covering the mechanism between a platform and a base.

Page 5

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Art Unit: 3654

Conclusion

- 11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 12. Yamamoto (JP 2002179368 A) specifically teaches covers (312) mount in the same plane with the outer surfaces or the upper and lower cages (see Figure 2).
- 13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rakesh Kumar whose telephone number is (517) 272-8314. The examiner can normally be reached on 8:00AM 4:30PM.
- 14. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathy Matecki can be reached on (571) 272-6951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
